Mobile Device Management

stratix
Nonstop Mobility.

Stratix Mobile Device Management

Stratix's Mobile Device Management solution manages, monitors, secures and supports mobile devices, regardless of their location or service provider. Featuring over-the-air distribution of applications, data, configuration and security settings, our MDM/EMM services manage a broad array of devices including smartphones, tablets, printers, terminals and ruggedized mobile devices.

Our Capabilities:

- **Technology Workshops & Gap Analysis** – solution road mapping, change management best practices, business alignment
- **Configuration & Implementation** – from install to user & device authentication, through to device provisioning
- **Security Consulting** – we cover device security, encryption, data loss prevention, regulatory compliance and policy best practices
- **Administration & Change Management** – offload the deployment, maintenance and support of your mobile applications

The WHY Stratix

We transform mobile experiences through service excellence.

- Expertise with complex, large scale environments
- Depth & breath of services
- Agnostic services with broad OEM ecosystem
- Integration with holistic mobility lifecycle management
- Flexible pricing & SLA options

Outcomes We Deliver

Greater ROI

Improve your MDM / EMM return on investment through higher adoption and business alignment

Mitigate Risks

Mitigate mobile security risks from negatively impacting your brand reputation, employee productivity and the customer experience

Simplify Management

Simplify overall management of your MDM / EMM platform and reduce the on-going maintenance burden your IT team supports today
