

The Technology Powering Virtual Care

How Virtual Care Drives Better Patient Outcomes and Lowers Costs

Managing Patient Engagement

Benefits of providing tablets to in-hospital patients:

Accessing patient records (EMR/EHR)

Care Coordination

Connect with friends and family

Real-time patient monitoring and access

Extending the hospital without walls program¹

Remote Patient Monitoring

Managing patient discharge and chronic disease management²

Improved quality of care with 40% decrease in hospitalization

Quick access to caregivers

Proactive consultation over real-time health data

Visiting Nurse Care

Benefits of equipping visiting nurses with tablets³

Improve patient engagement and outcome

Save time

Minimize adverse events

Increase access to needed information

Ensure timely and accurate documentation

Use as entry key to homes of elderly patients

The Mobile Tools Empowering Home Healthcare Agencies

Mobile Tech as a Tool

- Purpose built ruggedized tablets
- Multipurpose active smartphones
- Wearables

Accessories

- Custom cases and accessories built for frontline workers
- Bluetooth biometric devices such as Wireless Scales (Bariatric), Blood Pressure Cuffs, and Pulse Oximeters

Use Cases

- Access care plans, patient records, new referral and physician ordering in real time
- Allowing for customized workflow tools, increased productivity, patient transparency and faster billing
- Physician case management and analytic dashboards
- Eliminate paper waste with online document management
- Allowing you to manage referrals and physician contracts

Managing Your Post -Acute Care Programs at Scale

- Flexible financing/Mobile Device as a Service (MDaaS)
- Device provisioning with five-nine reliability out of the box
- Custom provisioning and connectivity
- MDM management to meet compliance and regulatory standards
- 24 x 7 x 365 Replacement of devices within 24 hrs turn around
- Direct deployment to patient homes to reduce provider contact
- 24x7 Tier 1 help desk to ensure continuity of care
- iTrac 360-degree visibility into your fleet of mobile assets
