

## Stratix | VMware

Our expert enterprise mobility management (EMM) consultants will help you build the best endpoint management solution for your environment and goals. We handle the day-to-day administration, upgrades, updates, and troubleshooting so your IT staff can focus on innovation and growth activities.

- **Solution Strategy** – We work to fully understand your requirements and match you with the best EMM platform. We build the EMM environmental structure and layout with an eye on futureproofing and potential capacity expansion.
- **Pre-Deployment** – We offer health checks for your current EMM platform along with consolidation, migration, or new implementation services.
- **Device Enrollment** – We do EMM device enrollment, profile and configuration setup, application of security and compliance policies, app distribution, and IT and third-party systems integration.
- **Support** – Our technicians assist with escalation and issue resolution, device remote control, monitoring, analysis, and reporting.
- **Day-to-Day Management** – We handle the day-to-day management of your EMM environment, including change management, OS and app updates or rollouts, and API and automation integration.
- **Asset Management** – Our services include migration planning, version control, inventory management and asset tracking, and integration for efficient RMA/repair operations.
