Enhanced Cellular Data Connectivity

What Do You Do When Network Strength Varies by Provider and Location?

Mobile device connectivity is critical to enterprise workflows. Employees need the highest speeds available as they move around to ensure maximum productivity and the best possible user experiences. Whether it is smartphones, tablets, wearables, scanners, ruggedized devices, or IoT components, the challenge is the quality of connections from different carrier networks can change depending on location. Connectivity is so critical that organizations must have a strategy to keep devices working at their best anytime and anywhere.

Stratix Enhanced Cellular Data Connectivity Ensures the Best Signal Every Time

With Stratix enhanced cellular data connectivity, you get a single data plan that uses SmartSIM technology to automatically connect devices to the strongest carrier network. Forget about juggling multiple carriers, managing different wireless plans, and trying to optimize the best connectivity for your end users on your own. Our advanced connectivity capabilities are vital to ensuring end-user connectivity anytime and anywhere at a lower cost.

Challenge	Solution
Employees struggle with connectivity depending on their location	Stratix Enhanced Cellular Data Connectivity ensures workers have the best available signal wherever they are.
Multiple carrier contracts, invoices, and platforms	With Stratix, you have one contract to manage and receive a single invoice for all your data connectivity needs from one platform.
No help desk for employees	Stratix's onshore level 1 help desk supports your end users 24x7x265
Deployment difficulties working with the carriers	Our experienced resources and enterprise-grade toolsets deliver mobility programs that meet and exceed your expected outcomes

Stratix Enterprise Mobility Services

- Assess and design the proper data plans to meet end-users' data requirements

- Managing the procurement and logistics of hardware and SmartSIMs—alleviating the need for you to work through your carrier provisioning and activation of wireless services—ready to use out of the box

- 24x7 end-user help desk

- Lifecycle services—only pay carrier services for devices that are deployed and in use

Key Business Benefits

- Month-to-month plans give you the flexibility to activate, deactivate, or suspend service as your business requires

- Increased end-user productivity and ROI with SmartSIM technology that automatically switches to the strongest network

- Alleviates the requirement from your IT team to manage the carrier services — allowing them to focus on other tasks

- Manage data plans to reduce overage fees

- Devices assigned to the correct data plan—alleviating unpredictable costs

---

Forty Years of experience helping customers solve their technology challenges

Average 70+ Net Promoter Score – double the industry average

Automatic carrier switching to connect to the strongest carrier network

24x7x365 U.S.-based service and support

Flexible and scalable pricing – update or change plans on the fly
