

How The Stratix As-Needed Ordering Portal Will Help Your Organization:

Save time

Using the ordering portal, users can create new orders in three clicks and check order status and tracking information in seconds on the order history page.

Order on your schedule

Because the portal is always open for business, users can place requests when it's convenient and not have to wait for someone to respond.

Accuracy ensured

Pre-defined bundles of products and accessories ensure that users will get the right combination, and nothing will be left out. Users can review their orders in the portal before they're shipped. The right equipment gets to the right locations exactly when it's needed.

High visibility

Users can see the inventory availability/lead times for products, track the status of a request 24x7, or look up past orders and shipments.

Maximum flexibility

Orders can be shipped anywhere in the United States, and large requests with multiple ship-to locations can be placed at one time.
