

SOLUTION BRIEF:

Honeywell and Stratix Speed Digital Transformation for Enterprises

Mobile devices are at the forefront of digital transformation for many companies. Handheld computers digitize workflows, boost productivity, improve collaboration, and generate actionable data—enabling enterprises to make better strategic decisions and be nimbler in uncertain times. Honeywell® makes best-in-class handheld computers that are perfect for digital transformation initiatives. They combine powerful performance with user-friendly designs.

Honeywell for Transportation, Logistics, & Warehouse Operations

The rise in eCommerce has put unprecedented pressure on companies to deliver on time, on budget, and at the speed consumers expect. Rugged Honeywell handheld computers transform operations by removing pen and paper from workflows, speeding up picking and packing, and optimizing routes. Real-time updates and predictive analytics help break down supply chain bottlenecks. With Honeywell, you increase accuracy, productivity, and efficiency.

Honeywell for Retail

Meeting higher customer expectations in retail is just one example of how Honeywell handheld computers transform business operations. Associates using Honeywell mobile devices make the customer experience between digital and brick-and-mortar seamless. Multi-use devices can manage buy-online-pickup-in-store (BOPIS), oversee inventory, help customers anywhere, and take payments—all while generating information about customers and capturing data for supply chain visibility that improves overall performance.

Honeywell is Even Better with Stratix Managed Mobile Services

Stratix can help you design, deploy, and support solutions leveraging the entire portfolio of Honeywell mobile devices. We do everything for you so you can quickly implement solutions that'll improve your business.

- **Mobile solution consulting** – Our solution architects will work to understand your needs, challenges, and goals to craft a mobile blueprint that'll get you exactly where you want to go.
- **Project management** – We're experts in administering large-scale mobile solution programs on-time and on budget.
- **Superior mobile deployment** – Our U.S. advanced Mobile Integration Center kits and configures thousands of devices with a personalized out-of-the-box-ready experience.
- **Portals make it simple** – Stratix offers ordering portals that give users an eCommerce-like experience for choosing equipment and delivery options.
- **Endpoint management** – Devices can be managed remotely, providing security, customization, and easy updating.
- **itrac360** – Our proprietary asset management portal gives you 360-degree visibility of your entire fleet of mobile assets, enabling better analytics and control of your total cost of ownership.
- **Industry-leading support** – Our on-shore 24/7 help desk is staffed by highly-trained experts who know your environment. We also offer rapid repair turnaround and spare pool management to minimize downtime.
- **Mobile Device as a Service** – Mobile hardware, software, and services rolled into a convenient monthly per-device price moves CapEx to OpEx.

One Hand to Shake

Honeywell handheld mobile computers are ultra-reliable and meet business-critical demands easily with their stability, durability, and outstanding performance. When you partner with Stratix on solutions leveraging Honeywell technology, we simplify vendor management thanks to our all-in-one services. You know who to hold accountable and can rest easy knowing we'll deliver.

Why Stratix

As North America's premier enterprise mobility specialist, Stratix focuses exclusively on mobility services and has over three million devices deployed. Our services are backed by specialized teams to consult, deploy, manage, and support your mobile program, guaranteeing nonstop mobility for your employees.

Why Honeywell

Honeywell is in the business of changing how the world works. They work on cultivating a culture of creativity, speed, and agility every day so we can meet all challenges head-on. Honeywell develops and deploys an innovative range of solutions, software, and services that help keep workers and workplaces safer and more productive and supply chains and assets more efficient, accurate, and reliable.
