

FUYL SMART LOCKERS For Aviation Operations

Keep flight crews connected, compliant, and always ready for departure.

FUYL Smart Lockers eliminate device downtime, loss, and manual checkouts. Employees access secure, charged devices anytime, anywhere — keeping operations on schedule and compliant.

Challenges We Solve

SmartMobile Zero-Downtime Replacement from LocknCharge and Stratix eliminates device downtime and reduces IT workload through a fully managed lifecycle service.

- ✓ **Inconsistent, manual checkouts** — With automated ID-based checkout and returns, the complexity of shared devices across shifts and roles is eliminated, and devices are always charged and ready to go.
- ✓ **Device downtime impacts operations** — When devices fail, and you don't have 24 hours to get a replacement, Stratix's 24/7 Help Desk triages issues instantly and directs users to on-site lockers for a rapid swap — ensuring no downtime or disruption to flight schedules.
- ✓ **Security gaps** — Devices stored in unsecured rooms or mixed-access areas expose security risks. FUYL Smart Lockers provide secure, ID-based access and audit trails, ensuring compliant, flight-ready devices at all times.
- ✓ **IT workload** — Airline IT teams lose valuable time tracking and repairing devices; Stratix integrates FUYL Smart Lockers with lifecycle services to automate RMAs and provide visibility through itrac360.

END-TO-END DEVICE READINESS FOR AVIATION

Together, LocknCharge and Stratix deliver a turnkey mobility solution for aviation operations:

Device Management & Deployment

Stratix configures and deploys EFBs and crew devices with airline-standard policies.

24/7 Support & Spares Management

Stratix's SmartMobile Service Centers and FUYL Smart Lockers ensure instant device swaps to minimize downtime.

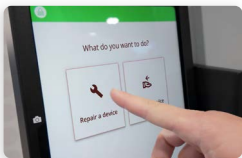

Secure Storage & Charging

LocknCharge FUYL Smart Lockers keep devices fully charged, compliant, and available for immediate access.

Complete Lifecycle Visibility

Integrated tracking ensures every device is accounted for — from deployment to retirement.

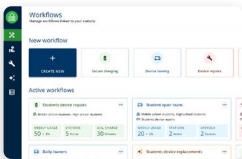

PROVEN IMPACTS FOR AVIATION OPERATIONS

**Reduce Delays**

Pilots and crew can instantly swap non-working devices, avoiding flight delays.

**Maximize Crew Productivity**

Fully charged and flight-ready devices available 24/7.

**Improve Compliance**

Secure storage with ID-based access supports FAA and InfoSec requirements.

**Reduce IT Workload**

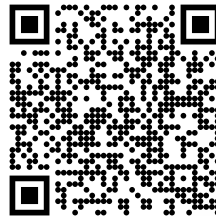

Automated workflows minimize manual tracking and support requests.

**Streamline Turnovers**

Standardized device checkout processes across bases ensure readiness.

**FUYL Smart Lockers**

Prevent device loss. Reduce downtime.
Keep your crews operational and compliant.
