

Solution Brief:

Stratix and Google Pixel SmartFrontline for the Mobile Workforce

Frontline and field service teams are the heartbeat of every service-driven organization. Yet, keeping these mobile workers connected, productive, and supported across large, distributed environments can be a challenge.

Stratix and Google Pixel have partnered to create SmartFrontline, a packaged mobility solution that delivers AI-powered devices, connectivity, and managed services for one simple, per-device, per-month price.

Built for organizations that rely on mobile-first field operations, SmartFrontline ensures your teams stay connected, secure, and productive wherever the work takes them.

The Challenge

Field service organizations face growing complexity in managing mobile programs:

- Disconnected devices and inconsistent connectivity across carriers
- Rising costs from fragmented service contracts and device downtime
- Increased IT workload to deploy, manage, and support large mobile fleets
- A need for AI-enabled devices to power next-generation tools and workflows

These challenges impact productivity, customer satisfaction, and profitability, particularly when teams rely on their devices to deliver results in real-time.

Pixel SmartFrontline Package

Upgrade to powerful frontline technology when you pair the Google Pixel with industry-leading Stratix services.

Equipped with Google's Tensor G5 processor and extended battery performance, Pixel devices provide exceptional speed, efficiency, and uptime.

3-year hardware and services packages start at:

\$35 a month per user

*Monthly pricing determined by hardware & contract term. Pricing shown is for the Google Pixel 9a device, quantity of 500, and a 36-month term

The Solution: SmartFrontline

SmartFrontline brings together everything a mobile workforce needs to succeed in the field, all in one managed package.

Stratix Connectivity

- Smart-SIM technology for seamless, multi-carrier coverage
- Pooled data for enterprise-grade flexibility and cost efficiency
- Optimized for reliability, speed, and uptime, so your teams stay connected wherever they go

Google Pixel Devices

- Fast, secure, AI-powered smartphones built for performance and durability
- Seamless Android Enterprise integration for easy management and security
- Advanced on-device intelligence for smarter workflows, image capture, and real-time insights

Stratix Managed Mobility Services

- End-to-end device lifecycle management, provisioning, and logistics
- 24x7x365 U.S.-based support for field and IT teams
- Expert monitoring, repair, and refresh services to maximize uptime and ROI
