

Powering the Modern Retail Store

What Does Stratix Do?

Stratix helps retailers turn mobile technology into a competitive advantage by designing, deploying, and managing the devices and technologies that power modern store operations. From mobile POS and inventory management to store connectivity and frontline support, Stratix ensures every device is ready, secure, and working when it matters most. The result is faster transactions, better associate productivity, and more connected in-store experiences—all backed by a single partner that **simplifies complexity** and keeps your retail environment running smoothly at scale.

Our Services

Professional Services

Consulting and onboarding that deliver right-fit support model from day one, aligning mobility strategy with your needs.

Managed Lifecycle Services

Staging and kitting of fully configured, ready-to-use devices out of the box, plus lifecycle management that delivers fast repairs and replacements to minimize downtime.
